Projects

RentalVate [↗](#)

Developed a tenant service request platform using **Next.js** and **Redux Toolkit**. Implemented dynamic routing to display task details based on unique task IDs, and utilized Redux for efficient state management to handle tenant requests seamlessly.

Lebaba [↗](#)

Developed an e-commerce platform for women’s accessories, featuring clothing and cosmetics. Implemented a dynamic cart system with **Redux Toolkit** and integrated **NextAuth** for secure user authentication, enhancing the overall shopping experience with seamless account management and order processing.

Goshop [↗](#)

JWT Authentication – Secure login and signup with JSON Web Tokens (JWT).

Admin & Client Roles – Separate dashboards for admins (manage products) and clients (browse, add to cart, manage orders).

Cart System – Clients can add products to their cart and checkout.

Arrosto [↗](#)

- Built a product page with **Next.js**, **Axios**, and **Redux Toolkit**, fetching data from an API and managing state.
- Used **dynamic routing** to display individual product details by ID.
